Tek-CARE® NC300 II

TekTone®'s Tek-CARE®NC300 II nurse call system provides your facility with everything you need to increase your staff's efficiency and job satisfaction.

Tek-CARE®NC300 II includes all the features and connectivity you expect from an advanced system. Adding a **Tek-PAGING®** system enables communication with staff on the move. Staff presence registration via nurse/aide presence switches allows you to locate your staff quickly and efficiently—without using overhead paging.

Nurse Call System

Tek-CARE®NC300 II offers two different options for your nurse master station. The direct-select master provides the simplicity of one-touch calling, while the NC304 master displays all pending calls in color, including such information as room description and patient name. Both master stations are easy to use and provide crystal-clear audio communication.

Add our **Tek-MMARS®II** system to track every call and generate reports that you can use to improve staff efficiency and protect your facility by documenting staff and system activity.

Tek-CARE®NC300 II is a fully independent system that does not rely on computers, ensuring reliability and safety. Every component is UL® Listed for use in skilled nursing facilities, hospitals and medical centers.
